Project uses 1 piece

Recommended Tools:

[XTL-5700] Fiskars 5 Precision Tip Scissors - Super Sharp, [XTL-3000] Bead Stopper- Stop Beads Sliding Off Stringing Material

Instructions

This design will give you a stretchable 7" bracelet.

1. Cut off two lengths of stretch cord, 12" each.
2. Place a bead stopper about 2" from one end.
3. Onto this cord thread on five seed beads and then thread in through the 3rd hole from the top of the bezel setting, across the bezel portion of the setting and out of the 3rd hole on the other side. (See photo for reference.) You will repeat this for all eight bezel cups.

4. Repeat the above process with the other piece of cord at the bottom of the bezel cups.
5. Now with your bracelet laid out flat you will place a dab of glue into one bezel setting. Place a black cameo facing up into the setting and hold for a moment for it to dry.
6. Move to the next bezel setting and repeat the above process with a green cameo facing downward. You will continue this pattern until you have done all 8 cameos.
7. Once the glue has dried, carefully pick up the two top corresponding ends of stretch cord and tie them in an overhand double knot. You can secure this knot with a small dab of E6000. Use a fine piece of wire to apply. Trim the ends of the cord.
8. Repeat with the bottom corresponding strands.
9. All done!
