SKU: WXM-030

Project uses 1 piece

Czech Glass Mini Dagger Beads, 2.5x6mm, 10 Gram Tube, Matte Metallic Flax

SKU: MDB-0022

Project uses 1 tube

Recommended Tools:

[XTL-5610] Xuron Memory Wire Cutters Cutting Pliers -Strong & Easy, [XTL-5514] Beadsmith

Jewelry Fine Round Nose Micro Pliers

Instructions

This project will use two loops of the memory wire. If you would like your bracelet to have additional loops you will need to get an extra tube of beads.

1. To begin, take your round nose pliers and make a simple loop at one end of the memory wire.
2. On to the other end, start stringing the mini dagger beads. For two loops around the memory wire you will use the entire tube.
3. When you have strung all the beads, cut the memory wire about 3/4" from the last bead. The beads should be a little loose on the wire so that they can move around a bit.
4. Take your round nose pliers and make a simple loop at the end of the memory wire.
5. All done!
