

# Garden Floral Kumihimo Bracelet

## Project B2410

*Kat Silvia*

Spiraling vines of flowers make this Kumihimo pattern a wonderfully pretty style. Try it in a variety of color palettes to suit your mood!

## What You'll Need

Toho Round Seed Beads 8/0 506 - Higher Metallic June Bug (8 Grams)

SKU: JSH-0110

Project uses 1 Tube

Toho Seed Beads, Round 8/0 #284 'Aqua/Gold Lined', 8 Grams

SKU: JSH-0058

Project uses 1 Tube

Toho Round Seed Beads 8/0 141 'Ceylon Snowflake' 8 Gram Tube

SKU: JSH-0059

Project uses 1 Tube

Super-Lon (S-Lon) Cord - Size 18 Twisted Nylon - White / 77 Yard Spool

SKU: XCR-4248

Project uses 1 Spool

Magnetic Clasp, Tube Cord Ends Fits 6.2mm Cord, 1 Set, Silver Plated

SKU: FCR-4246

Project uses 1 piece

E6000 Industrial Strength Glue Adhesive (0.18 fl oz)

SKU: XTL-1054

Project uses 1 piece

Beadsmith No Tangle Flexible Plastic Thread Bobbins For Kumihimo Or Macrame 1 7/8 Inch

(8 Pack), [XTL-6063] Gator Weight For Kumihimo Braiding - 1.6 Ounces (1)

## Instructions

These instructions will give you a bracelet that measures about 6 inches. To lengthen the size of the bracelet simply add beads to each strand respectively. As you braid you can measure, noting that the clasp will add 1 inch. You will also need a toothpick or scrap of wire for this project.

1. Begin by watching our video: [How to Braid Beaded Kumihimo and Make a Bracelet](#).
2. Then cut four stands of white cord, eight feet each. Fold in half and tie an overhand knot.
3. Place the cords in the disc as shown in the video and add your weight. Place the cord in each slot on either side of the dots.
4. You will then add 38 beads to each of the 8 strands and wind them around the bobbins in the following order: June Bug on the strands between 31 and 32, 32 and 1, 8 and 9, 24 and 25. Snowflake on 7 and 8, 23 and 24. Aqua/Gold Lined on 15 and 16, 16 and 17.
5. Begin the braid by braiding 1 inch of cord before adding the beads. Again, as you work measure the braid. Due to tension and tightness, a good idea is to measure as you feel you are getting close to your desired length. You may find you have to adjust the number of beads. Then continue braiding and finish with 1 inch of braiding without beads, same as you did at the beginning.
6. Carefully take the braid off of the disc, trim the bobbins off and tie an overhand knot.
7. To see how to finish with the magnetic clasp please watch our video: [How to Finish a Kumihimo Braid to Fit into a Larger Clasp or Cord End](#). Take a length of super-lon cord and tie an overhand knot over the braided portion of the end of the Kumihimo without the beads. Tie a second overhand knot to secure. Then take the tails and wrap around the braided portion to bulk up the tail end. When it is the right bulk to fit in the well of the clasp, tie another knot to secure and trim the ends with your scissors.
8. Trim the end of the braided portion so it fits inside the well of the cord end. Using a toothpick or scrap of wire, add a dab of E6000 to the well. Place the end of the braid into the cord end. Set aside. Move to the other end of the bracelet and repeat the above steps.
9. Allow to dry unclasped for at least 24 hours before wearing for maximum bond.
