Instructions

This necklace measures approximately 18 inches. To modify the length, simply adjust the length of chain on both sides respectively. You will also need some gloves and toothpicks for this project. We recommend watching all videos before beginning this project.

1. Mix your resin according to the instructions on the box. Equal parts of A and B. Transfer a small amount to separate cup. In this cup begin adding the color to achieve the level of green you desire. Pour this into the bezel. Also be sure at this stage to mix your white resin in a separate cup and set aside.
2. Next, please watch our video: How to Achieve a Marbled Effect in Resin. In this video you will see how to do the marbling technique in your resin using the white resin.
3. Once your resin is fully cured, you can assemble the necklace. This Nunn Design chain has links that open like jump rings.
4. Begin by opening the last link in the chain and removing it. Use this as a jump ring to attach the resin pendant to the open frame hoop and close the jump ring.
5. Remove another link to use as a jump ring. Attach this jump ring to the open frame hoop and to the center link in the chain. Close the jump ring.
6. Move to the right end of the necklace and open the last link and attach one lobster clasp.

If you need help with learning how to work with resin, please watch our intro video: How To Use Ice Resin.
