

You can easily add more seed beads to the length of the earring hook to customize this design. You will also need a toothpick or scrap piece of wire to apply your glue.

1. Open the loop at the base of your earring hook, the same way you would **open a jump ring**, and then slip your charm onto it. Close the loop back up.
2. Onto the earring hook, place a small dab of glue down near the loop but still on the main wire part. Slide 1 white bead down into the glue—you will just slide it from the end of the hook, over the arch, and down to the base. Now place a dab of glue right above the white bead and slide a green bead into it. Finally, place a small dab of glue above the green bead and slide a white bead onto it. Let all three beads dry.
3. Please repeat this process with your other earring. Enjoy!
