Instructions

No tools needed!

1. You will make 4 rings with the supplies for this project.
2. Flip over a cabochon so that flat side is facing up. Place a dab of E6000 glue onto the glue-on pad on the top of a ring finding. Flip that ring finding over and press it into the center of the backside of the cabochon (the flat side that is facing up on your work surface).
3. Repeat the previous step with the three remaining gemstones and rings.
4. Let dry for 24 hours before wearing.
