## Instructions

These instructions make a 7.5" bracelet. The quantities given include enough corduroy rubber cord to allow for an up to 8" bracelet. If you would like to make a larger bracelet, adjust the quantity accordingly. You will also need a ruler for this project.

1. First, we will make the beadwoven slider. To begin, watch the video How to do Flat Odd Count Peyote Stitch.
2. Thread your beading needle with about six feet of thread and create a piece of odd count peyote that is 17 beads wide and 38 rows long, following the pattern shown in the illustration.
3. With the thread still attached, zip up your peyote ends to create a tube. You can see an example of how to do this at the end of this video. Tie off and weave in your threads.
4. To assemble the bracelet, start by watching the video: How to Measure and Assemble a Regaliz Corduroy Rubber Bracelet.
5. In this video, you will learn how to measure and cut the corduroy rubber, add the beads, attach the clasp, and finish the bracelet.
6. Based upon what you learned in the video, cut your corduroy rubber so that you have a length that is 8" long.
7. Slide onto your corduroy rubber: 1 white o-ring, 1 silver plated slider, your bead woven tube, another silver plated slider, and another white o-ring.
8. Place some glue into the recess on one side of your clasp and slip one end of the corduroy rubber into the recess. Allow to dry.
9. Repeat the previous step on the other side of your bracelet.
10. Allow all glue to dry thoroughly before wearing.
