Play in the Waves Bracelet

Project B2077

Designer: Kat Silvia

This Peyote bracelet not only uses various sizes of beads but also uses various colors to highlight the change in bead size within these waves.

What You'll Need

Fireline Braided Beading Thread .006 In. - Smoke Grey - 15 Yards

SKU: XCR-1285

Project uses 1 spool

Toho Round Seed Beads 6/0 932 'Aqua/Capri Lined' 8 Gram Tube

SKU: JSF-0135

Project uses 1 tube

Toho Round Seed Beads 8/0 3B 'Transparent Dark Aquamarine' 8 Gram Tube

SKU: JSH-0223

Project uses 1 tube

Toho Round Seed Beads 11/0 942 Transparent Sapphire 8g

SKU: JSK-0275

Project uses 1 tube

Rhodium Plated 4-Strand Box Clasp - Rectangle Design - 27x9mm (1)

SKU: FCL-4924

Project uses 1 piece

Recommended Tools:

[XTL-0106] BeadSmith Cordless Thread Zap II Thread Burner Tool, [XTL-3006] Beadsmith English Beading Needles Size 12 (4 Needles)

Instructions

For this project please watch our video: How to do Peyote Bead Weaving with Various Sizes of Beads.

1. Using what you learned in the video, weave five "waves".

2. When you come to the end of the bead weaving, do not tie off your thread. You will use this tail to attach the clasp.

3. Before you attach the clasp, make sure that it has been separated and is facing the correct way. Please see photo for reference. Watch our video: How to Attach Tube Clasps to Peyote Bead Weaving.

4. Taking the thread from the end of your bead weaving, go down through the bead directly below that last bead. Thread up diagonally through the next two beads to be coming out the third bead in the top row.

5. Thread through the first hole of the clasp. And back down through the third bead creating a loop. Follow this loop thread path twice more for security.

6. Thread down through the adjacent bead and weave along the thread path and come up through the seventh bead.

7. Thread through the second hole of the clasp. And back down through the seventh bead creating a loop. Follow this loop thread path twice more for security.

8. Thread down through the adjacent bead and weave along the thread path and come up through the eleventh bead.

9. Thread through the third hole of the clasp. And back down through the eleventh bead creating a loop. Follow this loop thread path twice more for security.

10. Thread down through the adjacent bead and weave along the thread path and come up through the fifteenth bead.

11. Thread through the fourth hole of the clasp. And back down through the fifteenth bead creating a loop. Follow this loop thread path twice more for security.

12. Take your thread and follow back though the thread path to tie off and weave in your thread.

13. You will repeat this process for the other side of the bracelet to attach the other end of the clasp. Be sure to double check that you have the clasp facing the right way before attaching it.
