Eurotool Super New Glue - Heavy Duty Adhesive - 3 Gram Bottle

SKU: XTL-1059

Project uses 1 piece

### Recommended Tools:

[XTL-5500] Cord Cutter Tool For Regaliz Cord 3 Inches Long

### Instructions

Before you begin this project please watch our video [How to Measure and Assemble a Regaliz Corduroy Rubber Bracelet](#). This will help you with sizing so you know how much cord you will need to work with.

1. Take your eight inches of rubber cord and slide on the infinity slider.
2. Take one end of the cord and place it into the cord end, without glue. Repeat on the other side. This will help you with sizing. If you need to trim the cord, use the cord cutter tool for Regaliz to trim a little bit at a time.
3. Once you have your size, separate the magnetic clasp. Place a dab of super new glue into the well of one side of the clasp. Place the cord end into the clasp. Hold in place for a few moments. Repeat this on the other side of the clasp.
4. Note: make sure to leave the clasp un done while it dries completely over night before clasping together to wear.

5. All done!
