Wire/Soft Flex

Instructions

This bracelet measures 7.5", to modify the length simply adjust the length of chain and flower dangles added.

1. Begin by making all the dangles for your bracelet. Take one headpin and string on one gold bead, one dark blue tulip, one bead cap. Make a wrapped wire loop and trim any excess wire. Repeat 15 more times. Then repeat with for 16 dark pink tulip beads.
2. Take one headpin and string on blue trumpet lily and one green trumpet lily. Make a wrapped wire loop and trim any excess wire. Repeat 14 more times. Then repeat with for 15 pink trumpet lilies.
3. Cut off 7 inches of chain. To one end, using one jump ring attach one end of the toggle clasp. Move the other other end and attach the other end of the toggle clasp with another jump ring.
4. You are now ready to add the dangles. Do not add dangles to the first two links of the chain on either side. This is so that your clasp will work easily.
5. Using jump rings, attach the dangles in alternating order around the chain. Alternate the beads as well as which side of the links your are adding them on to. You will also be adding in the leaves as well using the jump rings.
6. Here is an example pattern but please modify this design to suit your style: Onto the third link in the chain, add one dark green leaf and one light pink flower. On the next link, add one dark blue flower. On the next link add one light green leaf and to the other side of this same link add one dark pink flower. Continue to cascade them around the chain. Want it fuller? Make and add more flower dangles or add in additional leaves.
7. Once you have added all of your dangles, you're all done!
