Project uses 44 Beads

Bright Gold Color Bracelet Memory Wire 12 Loops

SKU: WXM-030

Project uses 1 piece

22K Gold Plated Tube Clasp 22mm Three Rings Strands (2)

SKU: FCL-5503

Project uses 1 piece

Recommended Tools:

[XTL-5610] Xuron Memory Wire Cutters Cutting Pliers -Strong & Easy, [XTL-0034] Wubbers Classic Series Round Nose Quality Jeweller's Pliers, [XTL-0033] Wubbers Classic Series Chain Nose Quality Jeweller's Pliers

Instructions

1. Start by cutting off one and a quarter loops of memory wire. This will give you enough room to create the simple loops for the clasp. Repeat twice more.

2. To one end, make a simple wire loop, facing in towards the center of the memory wire.

3. Open the loop, same as you would a jump ring and attach it to the top loop of one side of the tube clasp.

4. String on 42 blue goldstone beads.

5. Make a simple wire loop, facing in towards the center of the memory wire. Note: You may need to trim the wire before making your simple loop. Attach the loop to the top loop of the other side of the tube clasp.

6. Take a second piece of memory wire and repeat the above process. Attach it to the middle loop of the tube clasp and on to this strand you will string 44 gold hematite beads.

7. Take a third and final piece of memory wire and repeat the above process. Attach it to the last loop of the tube clasp and on to this strand you will string 42 blue goldstone beads.

8. All done!
