SKU: FCO-9833

Project uses 1 piece

Recommended Tools:

[XTL-5700] Fiskars 5 Precision Tip Scissors - Super Sharp

Instructions

You will also need a lighter for this. Please use caution when using the lighter.

1. Please watch our video: How to Make a Ladder Paracord Bracelet. Follow along with this video to see how to make this bracelet. You will also see some helpful sizing tips as well. The maroon cord in the video represents the camo, the navy represents the green paracord.

2. Note that when you are attaching the clasp, instead of the ring as shown in the video you will use a lark's head knot over the buckle of the clasp.

3. When you come to that step, take your green length of paracord, find the center and make a lark's head knot. Then continue as shown in the video. Make sure that you have the buckle flipped so that the back side is facing up when you do your knot. As you braid, the side that is up will become the underside of the bracelet.

4. When you are at the step to add the camo paracord, find the center and make a lark's head knot. Then separate the two ends through the loops as shown in the video. Please see photo for reference.
