Instructions

This bracelet is adjustable. When sizing, simply measure the largest size needed to slip over the wrist. From there you will add the adjustable slider bad to wear comfortably. To modify the length, simply adjust the length of chain on both sides respectively. You will also need a scrap of thin wire and a toothpick for this bracelet.

1. Cut two 4.5 inch lengths of chain.
2. Open one jump ring and attach it to the end of one length of chain. Attach one eye setting link and close the jump ring. Move to the other side of this link and attach the other length of chain with another jump ring. Close the jump ring.
3. Using your thin scrap of wire and thread on one end link of chain using this wire as a needle thread it through the adjustable slider bead. Remove the wire. Slip the wire onto the other end link of chain and thread it through the slider bead criss crossing it so that the chains are coming out opposite ends of the bead.
4. Take one charm and attach it to the end of the chain using a jump ring. Repeat on the other side with a second charm.
5. Place a dab of glue into the well of the setting and set the fancy eye stone into the setting. Allow to dry for at least 24 hours before wearing.
