Instructions

1. Please watch our video: How to Use Memory Wire Glue In Ends. From what you learned in the video, string on one wood bead, add glue and then add one end cap. Press them together to secure the end. Allow to dry.

2. Then to the other end string on one skull bead.
3. Then one wood bead, one gold bead, one 8mm fire polish bead, one gold bead, one wood bead, one gold bead, one 6mm fire polish bead, and one gold bead. Repeat this pattern 23 times.
4. Then add one gold bead, one wood bead and one skull bead.
5. Finally trim the end of the memory wire with the memory wire cutters so you have about 1/4 inch. Carefully add a dab of glue to the end, add one more wood bead and add a memory wire end. You may need to hold it in place for a few minutes for the bond to take. But be sure to let dry for 24 hours for maximum bond.
