Short Chain Nose Pliers with Standard Handle and Tip Protector 5 Inches Long, 1 Piece

Instructions

Please note that some instructions may refer to a video. Search beadaholique.com for the underlined video title or return to this project's page on our website for clickable links.

This bracelet measures approximately 6.5 inches. To modify the length, simply adjust the length woven respectively.

1. To see a similar design, please watch our video: [How to do a Modified Right Angle Weave with Two Hole Beads](#). From what you learned in this video, begin the weaving by picking up one superduo bead, one seed bead, one red crystal, one seed bead, one superduo bead, one seed bead, one green pearl, one seed bead, one superduo bead, one seed bead, one red crystal, one seed bead, one superduo bead, one seed bead, one green pearl, and one seed bead; then tie an overhand knot. Go through the superduo bead and turn your thread around going back through the other hole of this superduo bead. Then pick up one seed bead and go through the next superduo bead. Continue to pick up one seed bead in between each as you complete this unit. Coming out of a superduo bead, turn your thread around again and weave around to come out of the red crystal. You are now ready to start the next unit.
2. To follow along with the pattern in the photo, you will need to alternate the red crystals and green pearls so that the red crystals are in the center of the bracelet and the green pearls are on the outside edges. Another change to the video is that instead of building it sideways so that it is double wide, simply continue in one long strand.
3. Once you have achieved your desired length, please watch our video: [How to Finish Right Angle Weave with Cymbal Bead Endings](#). In this video you will learn how to finish the bracelet with Cymbal Bead Endings and how to attach the magnetic clasp.
