## Instructions

1. Using your memory wire cutters, cut a length of gold plated bracelet memory wire that is 6 loops long.
2. Create a simple wire loop onto one end of your 6 loops of gold plated bracelet memory wire using your round nose pliers.
3. String on your beads in no particular order but do try to space out the colors for an even look. For instance, I started my bracelet with a gold plated square rounded bead, a gold seed bead, a blue seed bead, a hematite bugle bead, etc. It was a random order but I was making sure to not go more than a half inch of stringing without adding a bugle bead. Refer to photos for placement assistance or you can string the beads however you like.
4. Continue stringing until you have a 1/2 inch of memory wire left, at this point use your round nose pliers to create a second simple wire loop.
5. Using your chain nose pliers, open a gold plated jump ring and slide on your Eiffel tower charm and also the bottom loop of your bracelet. Close the jump ring.
6. That's it!
