SKU: FJR-5452

Project uses 10 pieces

Recommended Tools:

[XTL-5511] Beadsmith Jeweller's Micro Pliers Chain Nose Flat Nose, [XTL-5603] CHP Milano

Heavy Duty Flush Cutter - Cuts Up To 2.5mm Copper Wire

Instructions

The chain used in this project is quite sturdy. You will need heavy duty flush cutters for this project. Including the box clasp, this bracelet measures 7.5 inches. To make it larger or smaller, simply adjust the chain length.

1. Using your flush cutters, carefully cut five 7 inch lengths of your box chain, making sure to not leave any broken chain links on the ends.
2. Open a gold plated jump ring and slide it onto the last link from one end of one length of chain. Before closing, also slide it onto the first loop on your rhodium box chain and close.
3. Repeat the same thing with another jump ring and the other side of that same length of chain, and the loop on the other side of your box clasp.
4. Next, attach the rest of your chain lengths to the loops on your box clasp like in the previous step. See photo.
5. Close you're clasp and you're done!
