- Thread the wire through one the 2x2 crimp tube, thread one end through loop on the round part of the toggle and also through the end link of the 6mm chain link dangle, then through the center link of the of the 4mm chain with 2 dangles. Thread through 2x2 crimp tube, before closing the crimp, thread wire through 3 to 4 beads and then crimp with crimper pliers. Cover with corrugated crimp cover (FCR-1030) using your crimping pliers ever so gently closing it around the crimp, trim off excess wire.

- Remove Bead Stopper. Thread the other end of the wire through loop of the T-bar and also through the end link of the 4mm chain (2 links with dangle) and back through the 2x2 crimp tube. Before closing the 2x2 crimp, thread wire through 3 to 4 beads pulling the wire until beads are snug but flexible so the bracelet will bend freely around your wrist.
