

## Enchanted Flame Bracelet

### Project B640

Designer: Julie Bean [Skill Level: Beginner]

Make this beautiful bracelet in under 10 minutes using only 3 ingredients! The high shine of the black bezel bracelet contrasts nicely against the pretty patina on the embossed Lillypilly Designs copper sheet used for the inserts. You will want to make these for all your friends!

## What You'll Need

Lillypilly Copper Sheet Metal Floral Embossed Enchantment Patina 36 Gauge - 3x3

SKU: LIL-1053  
Project uses 1 piece

Black Plastic Stretch Bezel Collage Bracelet 20mm Squares - 7 Inches (1)

SKU: JB-4002  
Project uses 1 piece

E6000 Industrial Strength Glue Adhesive (0.18 fl oz)

SKU: XTL-1054  
Project uses 1 piece

## Specialized Tools

BeadSmith 7 Plate Shears With Spring - Cuts Up To 20 Gauge Sheet Metal

SKU: XTL-5602

Eurotool Clear Safety Glasses With Dark Blue Adjustable Frame

SKU: XTL-0170

## Instructions:

NOTE: You will also need a ruler and a pen to complete this project.

Each of the squares on this bracelet are 20mm x 20mm. For this project, I decided to cut my squares to be 3/4" x 3/4", which is a little small but very close and much easier to measure than measuring 20mm x 20mm.

Always wear eye protection when cutting metal.

1. Flip your copper sheet over on your work table so that the patina side is down and the shiny copper side is facing upwards.
2. Using a ruler, measure from a side edge 3/4" inward. Make a mark. Do this at several places going from that same edge. Draw a line connecting the dots so that you have a strip that is 3/4" wide. Now repeat this step but use the line you just drew as the starting point. You should now have 2 strips that are 3/4" wide each. To turn these into squares, just turn your copper sheet so that you are measuring from the side edge next to the original one you were measuring from and measure 3/4" inward. Make several measurement marks and draw a line. Then repeat this step using the line you just drew as a starting point and then repeat the step again. You just made a grid.
3. Put on your protective eye wear.
4. Cut the squares out of your metal sheet using metal shears. You can see how to do this [HERE](#)
5. The copper sheets are very flexible, if any are bent, use your fingers to flatten them out so that they are straight. They might be sharp, so be cautious
6. Place a dab of E6000 on the backside (shiny copper) of a square and spread it out a bit so that it almost goes to the edge. Do not use too much glue, you do not want it to spill out over the edges. Flip over and press into place on one of the bracelet bezel setting. Repeat this step with the other 7 bracelet bezel settings and Lillypilly copper squares.
7. Let dry.

## Variations

There are so many different Lillypilly copper sheet designs that you can use to make this project. Have fun choosing!

When substituting in items, pay attention to sizes and styles to make sure all your pieces will fit together.
