SKU: XTL-1054

Project uses 1 piece

Recommended Tools:

[XTL-4004] Beadsmith Magical Rhinestone Pick Up Tool With Cleaning Kit - Great For Placing Flatback Rhinestones

Instructions

1. Begin by watching our video: How to Use Crystal Clay with Swarovski Chatons. From what you have seen in the video, mix equal parts A and B of your clay about the size of a small marble or about 15mm.
2. Place the clay into the bottle cap bezel and smooth over the clay.
3. Using the Magic Pick or the beeswax pick, place the chatons into the clay. Use an abstract pattern to achieve a fun look. I recommend starting with the largest size and using the two smaller sizes to fill in any gaps.

4. Allow your clay to dry for at least 24 hours.

5. Flip the bottle cap over and place a dab of E6000 on the center back, and place your magnet back onto the center. Allow to dry 24 hours before placing on to a magnetic surface.
