### Instructions:

By following the instructions below, you will make one earring. Repeat all instructions to make the second earring.

Before you begin, please watch our video: [How to use Crystal Clay](#).

1. Note: You only have to mix one batch of crystal clay for this project. Just set aside half for the second earring.
2. Mix a ball of part A (about the size of a small blueberry) and an equal part B until blended. Halve this ball and set aside for the second earring.
3. Place the Crystal Clay into the bezel earring setting so the top of the clay is just slightly above the edge of the bezel. Smooth the top of the clay with your finger.
4. Use the beeswax applicator and the photo to reference the placement of the chatons for this design. Seven chatons in a "V" formation.
5. Set aside and allow the clay to fully cure for 24 hours.

### Variations

Choose your favorite color of Crystal Clay for this project.

When substituting in items, pay attention to sizes and styles to make sure all your pieces will fit together.
