[XTL-5511] Beadsmith Jeweller's Micro Pliers Chain Nose Flat Nose, [XTL-5514] Beadsmith Jewelry Fine Round Nose Micro Pliers, [TRC-604] ICE Resin, Mixing Cups & White Stir Sticks, 20 Pack

## Instructions

By following the instructions below you will make one earring. Repeat all instructions to make the second earring. You will also need packing tape for this project. You will also need a lighter for this project.

1. Please watch our video: How to Use Colorized Resin in an Open Frame Hoop by Becky Nunn. From what you learned please add the packing tape to the back on the bezel pendants.
2. Next, mix your resin as seen in our video: How To Use Easy Cast Clear Casting Epoxy Resin To Make Pendants.
3. Separate your resin into two cups. In one cup add a few drops of yellow pigment until your desired color is achieved. In the second cup add red and

yellow to make an orange color. If you'd like you can add a bit of opaque white to each cup to adjust the colors.

4. Once you have achieved your desired color use a popsicle stick add the resin to the bezels with the yellow on bottom and the orange on top. Allow to cure about 24 hours. Using a lighter to get rid of any air bubbles about 30 minutes after you pour.

5. Finally, open one earring hook same as you would a jump ring and attach it to the finished pendant.
