Xuron Sharp Flush Cutter Pliers - Wire/Soft Flex

SKU: XTL-5600

Wire Looping Pliers - Concave And Round Nose

SKU: XTL-5032

Instructions:

These beads are a little bit fragile, so I don't recommend creating a wrapped wire loop on them.

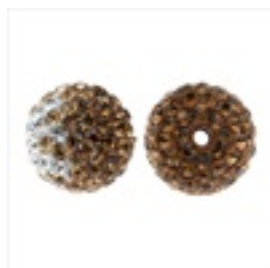

Please remember to double these instructions to create your matched pair of earrings.

1. Place a sapphire Czech crystal drop pave bead onto a sterling silver 2", 22 gauge head pin and create a simple wire loop after the bead.
2. Using your flush cutters, clip the head off of another head pin. Create a simple wire loop at the end of the head pin. Then slide a sapphire rainbow Czech crystal round pave bead onto the pin and create another simple loop after the bead.
3. Open one of the loops on the round bead and attach it to the loop on the drop.
4. Open the loop on a sterling silver French wire earring hook and hang the free loop on the round bead from it; close the loop.
5. Enjoy your sparkly new earrings!

Variations

Choose your favorite color of Czech crystal pave beads to personalize your pair of earrings.

When substituting in items, pay attention to sizes and styles to make sure all your pieces will fit together.
