Project uses 2 pieces

ICE Resin Jewelers Grade Clear Casting Epoxy Resin 8 oz Kit

SKU: TRC-10

Project uses 1 set

Art Glitter, Shard Glass Glitter, 28 Gram Container, Silvery Moon

SKU: XTL-1190

Project uses 1 piece

Instructions

1. Begin by carefully filling half of your antiqued silver Nunn Design triangle pendant with silver shard glass glitter, making sure to not add too much glitter since you will be adding in your resin on top.
2. Next, watch the video on How to Use Ice Resin.
3. Following what you learned in the video, mix your 2-part resin using a stir stick and carefully fill your triangle bezel with resin, one drop at a time. Make sure to not overfill the resin or have it spill over. Set aside.
4. Check back in a few minutes later and see if any bubbles have risen to the surface, get rid of them by using a heat source such as a micro torch. Check back again in another few minutes and see if any new bubbles have popped up - remove if necessary.
5. Let your resin cure for 3 days.
6. Once your resin has cured, open the hook on an antiqued silver kidney wire earring hook and slide it onto the loop on your bezel and close.
7. Enjoy!
