SKU: XTL-1054

Project uses 1 tube

Instructions

By following the instructions below you will make one earring. Repeat all instructions to make the second earring. To begin, prepare your work area for a lot of glue use-it could get sticky!

1. Take one customizable earring and spread a generous amount of E6000 into it, almost filling it to the top.
2. Carefully place your ohm bead right in the center, as shown in the photos.
3. Sprinkle the hex cut Miyuki beads around the ohm bead, pressing down gently and adding a few layers until the glue is no longer visible.
4. Allow it to dry overnight.
