Specialized Tools

E6000 Industrial Strength Glue Adhesive (3.7 Oz)

SKU: XTL-1050

Instructions:

1. Taking a toothpick or small piece of wire, place a dab of E6000 adhesive onto the back of your lucite flower cabochon. Center your cabochon in the middle of your white filigree piece so that the slightly curved edges are facing up. Press into place. It is ok if a little of the glue seeps through the filigree.
2. Place a dab of E6000 on the flat portion of your bobby pin and glue to the back side of your filigree/cabochon piece. Press them together. Let dry for 24 hours.
3. Make your second bobby pin the same way. Enjoy!
