Micro Pliers Chain Nose Flat Nose, [XTL-5514] Beadsmith Jewelry Fine Round Nose Micro

Pliers

Instructions

These instructions will give you a necklace that is approximately 19 Inches. To adjust the length simply modify the length of chain on each side respectively.

1. Begin by cutting two lengths of chain 10 inches each. When you cut the chain, you should have one ball link with both jump rings attached at the beginning of the chain and at the other end cut off the last link before the ball so you have a length of chain without the ball. You will need both lengths of chain to be the same.
2. Take one length of chain with the chain at the end (not the ball), and string it through the opening on one side of the infinity link.
3. Open one jump ring and attach the end of this chain to the jump ring attached to the adjacent ball link of this chain. Close the jump ring. Repeat the above two steps on the other side of the infinity link.

4. Move to the end of the chain and open one jump ring. Attach it to the last jump ring in the chain. Close the jump ring.
5. Move to the other end of the chain and open one jump ring. Attach it to the last jump ring in the chain and to one lobster clasp. Close the jump ring.
6. All done!
