Instructions:

1. You can make this necklace as custom as you would like by adding or deleting extra links of each of the chains. I made each of the pieces of chain 8 inches in length on the front part.
2. Start by cutting the length of each piece of chain to your desired length. I cut the brass parallel chain for the back (CHA-9716) to 7 inches in length. Set aside.
3. Open one of the large brass jump rings (FJR-5331). Link the jump ring onto the end link of each of the lengths of chain (set aside the brass parallel chain for the back of the necklace) and the Swarovski cosmic ring (SWC-9025). Close jump ring.
4. Open the other large brass jump ring. Link the jump ring onto the other end link of each of the chains and the other Swarovski cosmic ring. Close jump ring.
5. Open the large silver jump ring (FJR-4010). Link the jump ring onto the brass parallel chain you cut for the back and one of the Swarovski cosmic rings. Close jump ring.
6. Open the small silver jump ring (FJR-3054). Link the jump ring onto the other end link of the parallel brass chain you cut for the back and the toggle clasp (FCL-7506). Close jump ring. You're finished!
