

To make this bracelet, you can either put the beads on randomly or in a pattern of your choosing.

1. Do not pre-cut your wire.
2. Begin by watching the video: [How to Finish Memory Wire Ends with Finial Beads](#). Using GS Hypo Cement, glue a Finial bead to your memory wire end. Let dry.
3. Place your beads onto the memory wire in a random order. Tip: alternate sizes of beads to create a varied interesting look. You can also cluster beads and put 3 or 5 of the same bead in a row together for a blocking pattern. Feel free to refer to the project photo for inspiration.
4. When you have finished placing all your beads, cut your wire so that approximately 1/4" remains. [Create a simple wire loop](#) after the last bead.
5. Place 1 or 2 beads of your choosing onto a ball head pin. [Create a simple wire loop](#) after the bead and link to the loop you just made on your memory wire bracelet, opening the loop on our dangle the way you would [open a jump ring](#).
6. Repeat the previous step 2 more times, adding 2 more dangles. All done! Enjoy!

WHAT YOU'LL NEED: (scroll down for purchase options)

- WXM-030 - Memory Wire, Bracelet Round Size Medium 2.25 Diameter, 12 Loops, Gold Plated  
Project uses 4 loops. You will need 1 package(s).
