SKU: XTL-1054
Project uses 1 package

Specialized Tools

Beadsmith Jeweller's Micro Pliers Chain Nose Flat Nose

SKU: XTL-5511

Instructions:

1. Watch the video: How to Make a Crystal Flower Ring with a Flower Ring Setting.
2. As demonstrated in the video, place a ss39 golden shadow crystal chaton into an antiqued brass flower adjustable ring setting, carefully opening the setting petals to fit the chaton.
3. If you feel like your ring needs extra stability, you can place a dab of E6000 glue onto the base of your chaton before inserting it into your ring.
4. Use a closed pair of chain nosed pliers to carefully bend the setting petals down onto the face of the chaton to secure it in place.
5. Adjust the base petals to the desired look. Adjust the ring to the desired size.

Variations

Choose your favorite color crystal chaton to give your flower ring a different feel.

When substituting in items, pay attention to sizes and styles to make sure all your pieces will fit together.
