[TRC-600] Art Mechanique, ICE Resin Mixing Cups & Stir Sticks, 5 Pack

Instructions

You will also need a box to prop up your ring on and some tap water.

1. Prop up your ring so that it is leveled on your work surface. You can use a shoe box or something similar for this.
2. Please watch our video: How to Make Concrete Jewelry. From what you learned in the video, mix and pour your concrete into the ring bezel.
3. Allow the concrete to fully cure before wearing your ring.
