Project uses 1 piece

Wire Elements, Tarnish Resistant Hematite Wire, 20 Gauge 15 Yards (13.5 Meters)
SKU: WNT-2036
Project uses 1 Spool

Wire Elements, Tarnish Resistant Rose Gold Wire, 26 Gauge 34 Yards (31 Meters)
SKU: WNT-2637
Project uses 1 Spool

Recommended Tools:
[XTL-9021] Solid Steel Ring Sizing Mandrel Wire Wrapping Tool, [PL5222] Tronex Tools, Flush Cutter Pliers with Standard Handle and Tip Protector 5 Inches Long, 1 Piece, [PL5130] Tronex Tools, Short Chain Nose Pliers with Standard Handle and Tip Protector 5 Inches Long, 1 Piece, [PL5320] Tronex Tools, Short Round Nose Pliers with Standard Handle and Tip Protector 5 Inches Long, 1 Piece

Instructions

Please use a ring mandrel to size the perfect ring for you.

1. Begin by cutting off about six inches of 20 gauge wire. Make a simple wire loop at one end. Bend it around the mandrel with the loop laying flat against the mandrel.

2. Cross over the wire and trim the wire, leaving just under a half inch to make another simple wire loop curling the opposite direction (please see photo for reference).

3. Once you have the base of the ring, cut off about 12 inches of the 26 gauge wire. Wrap 5 times around the 20 gauge wire. String on one pearl, and take the wire and make 5 more wraps around the other side of the ring, bringing it together. Trim any excess wire.
