SKU: XTL-1032

Project uses 1 piece

Recommended Tools:

[XTL-2222] Vintaj Metal Relief Block For Filing, Buffing & Sanding

Instructions

The ring used in this project is not adjustable and is a size 8. Please be mindful of ring size. You will need 2 paint brushes, gloves and paper towel for this project.

1. Begin by putting on your gloves (optional) and place your Nunn Design Ring onto a paper towel. Add a few drops of Vintaj patina ink onto your paper towel or other surface you don't mind using.
2. Next, take your brush, dip it in your patina ink and carefully dab your ring all around. Continue until your ring is covered in uniform dabs of patina. See photo.
3. While the patina is still wet, use the side of your Vintaj relief block to buff the ring surface and remove some of the patina.
4. Set aside to dry. Once completely dry, apply a coat of sealant with a brush onto the surface of your ring to seal in the patina. Let dry overnight.
5. You're done!
