

Checkerboard Tila Ring

Project R612
Designer: Julie Bean

This fun ring is a snap to make and will showcase your creativity to all your friends. The only tool required is a scrap piece of wire or a toothpick to smooth out the glue!

Miyuki Tila 2 Hole Square Beads Dark Bronze 7.2 Grams

SKU: DBT-457
Project uses 12 pieces

Bright Silver Tone Brass Square Bezel Adjustable Ring 26mm (1)

SKU: FRG-0857
Project uses 1 piece

E6000 Industrial Strength Glue Adhesive (0.18 fl oz)

SKU: XTL-1054
Project uses 1 piece

Instructions:

Please find a scrap piece of wire or a toothpick to apply the glue with before beginning this project.

1. Take a small amount of E6000 glue, and using a toothpick or scrap wire as an applicator, smear the glue on the flat surface of the bezel's interior surface. So that you do not need to rush, only smear it over half of the surface to begin with.
2. Starting along the edge, begin placing your Tila Beads into the glue in a checkerboard design. See photo.
3. 5 Tila Beads will fit length wise and 5 will fit width wise in the square ring. A total of 25 Tila Beads will be used in this project.
4. After you have tiled all the area where glue was present, take your applicator and apply glue to the remaining area.
5. Finish setting your Tila Beads into the glue.
6. When all the beads have been placed, pat their tops down with your finger so that all the beads are firmly set into the glue.
7. Let dry in an upright position overnight.

Variations

So many beautiful Tila Beads to choose from and so many combinations possible!

When substituting in items, pay attention to sizes and styles to make sure all your pieces will fit together.
