SKU: SPCB-59

Project uses 1 piece

E6000 Industrial Strength Glue Adhesive (0.18 fl oz)

SKU: XTL-1054

Project uses 1 piece

Instructions

Note: Before beginning, make sure your cabochon easily fits into the bezel setting of your ring. You might need to gently pry the prongs along the edge of the bezel back using chain nose or flat nose pliers.

1. Using a scrap piece of wire or a toothpick as an applicator, spread a layer of E6000 glue on the flat backside of the butterfly cabochon.
2. Flip over and press into your ring setting.
3. Let dry in an upright position overnight.
4. Enjoy!
