

# Sparkling Hope Ring

## Project R628

Designer: Julie Bean

There are many ways to show your support for breast cancer awareness and one very glittering way is by wearing the Sparkling Hope Ring. This ring was created with a multitude of SWAROVSKI ELEMENTS crystal chatons placed in a ribbon pattern on white Crystal Clay.

## Instructions

1. Please watch the video on How to use Crystal Clay.

2. Based upon what you learned in the video, mix up a large pea size amount of part A and a large pea size amount of part B white Crystal Clay. After it is mixed, shape it with your fingers so that it is approximately the size of your bezel ring setting. Place the clay into your bezel setting and smooth into place. You want the clay to be just slightly above the top edge of the bezel. If you need to pinch some off, do so, and then smooth out. Try to get as even and flat of a clay surface as possible.

3. Please look at the photo and place the rose and crystal SWAROVSKI ELEMENTS chatons into the clay in the pattern shown in the photo. Use the magical pick to place the chatons and make sure that their edge rests just slightly below the clay surface to hold them in place. One tip is to place the pp14 rose chatons first in a basic ribbon pattern, then next place the pp10 rose chatons around it. After all the rose chatons have been placed, then add the crystal chatons to fill in all the white space left.

4. Let cure overnight.
